

ORDINANCE NO. 264

The Town of Canyon City ordains as follows:

Section 1. Canyon City Ordinance No. 260 is amended by repealing Section 4 (5) in it's entirety and replaced with the following language:

Grease, oil and sand interceptors shall be provided when, in the opinion of City Representatives, they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand or other harmful ingredients: except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity to meet the below listed requirements and shall be located as to be readily and easily accessible for cleaning and inspection.

(1) Grease traps. The following conditions shall be in addition to the requirements of the Plumbing Code. In all cases where a structure is used as a hotel, boardinghouse or restaurant, or where required by the City, the owner shall provide a properly constructed grease trap through which all wastes of a greasy nature shall be drained. All grease traps shall be of a type, capacity and design approved by City Representatives. Traps shall be required under any of the following conditions:

- (A) Any liquid or vapor having a temperature higher than one hundred forty degrees Fahrenheit (one hundred forty degrees Fahrenheit = sixty degrees Celsius);
- (B) Any water or waste which may contain more than forty milligrams per liter by weight of animal or vegetable fat, oil or grease;
- (C) Any gasoline, benzene naphtha, fuel oil, or other flammable liquid, solid or gas, or other petroleum products and derivatives.
- (D) Any garbage that has not been properly shredded;
- (E) Any ashes, cinders, sand, mud straw, shavings, metal, glass, rags, feathers, tar, plastics, wood paunch manure, hair, bristles, or any other solid or viscous substance capable of causing obstruction to the flow in sewers or other interference with the proper operations of the sewage work. Grease traps to collect emulsified cooking grease from commercial establishments shall be located downstream from cooking and washing facilities a sufficient distance or be sufficiently large to cool liquid at or lower temperature than one hundred forty degrees Fahrenheit before leaving the

trap.

(2) Grease, oil sand interceptors-Installation.

Grease, oil, and sand interceptors or other necessary removal facilities shall be installed on premises at the owner's expense and liability when, in the opinion of City Representatives, they are necessary for the proper handling of sewage from the premises of or origination. All interceptors shall be of a type and capacity approved by City Representatives and shall be located as to be readily accessible for cleaning and inspection.

(3) Grease, oil sand interceptors-Construction.

Grease, oil and sand interceptors shall be constructed of impervious materials capable of withstanding abrupt and extreme changes in temperature. They shall be of substantial construction, watertight, and equipped with easily removable covers which when belted in place, shall be gastight and watertight.

(4) Grease, oil, sand interceptors-Maintenance.

Where installed, all grease, oil and sand interceptors shall be maintained by the owner, at his expense and liability, in continuously efficient operation at all times.

Section 2: Except as amended herein, Ordinance No. 260 shall continue in full force and effect.

PASSED by the Council of the Town of Canyon City, Oregon and approved by the Mayor December 19, 1995.

Russell Bratcher, Mayor

ATTEST:

Tammy Day, Recorder/Manager
