INDEPENDENT AUDITOR'S REPORT

Honorable Mayor and Members of the City Council City of Somerville, Texas

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Somerville, Texas, (the "City") as of and for the year ended September 30, 2020, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the

circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Somerville, Texas, as of September 30, 2020, and the respective changes in financial position and, where applicable, cash flows thereof and the respective budgetary comparison for the General Fund for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages 4 through 9, the Texas Municipal Retirement System ("TMRS") schedule of changes in net pension liability (asset) and related ratios on page 40, and the TMRS schedule of contributions on page 41 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of Somerville, Texas' basic financial statements. The other supplementary information as listed in the table of contents is presented for purposes of additional analysis and is not a required part of the financial statements.

The combining statements are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statement and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued a report dated July 7, 2021, on our consideration of the City's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering City of Somerville, Texas' internal control over financial reporting and compliance.

Brenham, Texas July 7, 2021 Side Samuel

MANAGEMENT'S DISCUSSION AND ANALYSIS

As management of the City of Somerville, we offer readers of the City of Somerville's financial statements this narrative overview and analysis of the financial activities of the City of Somerville for the fiscal year ended September 30, 2020. Please read it in conjunction with the independent auditors' report and the City's basic financial statements.

FINANCIAL HIGHLIGHTS

- The assets and deferred outflows of resources of the City of Somerville exceeded its liabilities and deferred inflows of resources at the close the most recent fiscal year by \$6,953,485 (net position). Of this amount, \$2,024,769 (unrestricted net position) may be used to meet the government's ongoing obligations to citizens and creditors.
- The City's net position increased by \$938,244.
- The City's governmental funds reported ending fund balances of \$1,478,532, which was an increase of \$153,543 from the prior year.
- The City's proprietary funds reported combined net position of \$5,106,407, which was an increase of \$231,333 from the prior year.
- The City's long-term liabilities at year-end totaled \$676,764, of which \$74,680 represents debt due and payable in the next year.

USING THIS ANNUAL REPORT

This annual report consists of a series of financial statements. The Statement of Net Position and the Statement of Activities provide information about the activities of the City as a whole and present a longer-term view of the City's finances. They reflect the flow of total economic resources in a manner similar to the financial reports of a business enterprise.

Fund financial statements report the City's operations in more detail than the government-wide statements by providing information about the City's most significant funds. For governmental funds, these statements tell how services were financed in the short term as well as what resources remain for future spending. They reflect the flow of current financial resources, and supply the basis for tax levies and the appropriations budget. For the proprietary fund, the financial statements tell how goods or services of the City were sold to customers and how the sales revenues covered the expenses of the goods or services.

The notes to the financial statements provide narrative explanations or additional data needed for full disclosure in the government-wide statements or the fund financial statements.

Reporting the City as a Whole

The Statement of Net Position and the Statement of Activities

Our analysis of the City as a whole begins with the government-wide financial statements. Their primary purpose is to show whether the City is better off as a result of the year's activities. The Statement of Net Position includes all of the City's assets, deferred outflows of resources,

liabilities, and deferred inflows of resources, using the accrual basis of accounting, which is similar to the accounting used by most private-sector companies.

All of the current year's revenues and expenses are taken into account regardless of when cash is received or paid.

The Statement of Net Position and the Statement of Activities report the City's net position and changes in them. The City's net position (the difference between assets, deferred outflows of resources, liabilities, and deferred inflows of resources) provide one measure of the City's financial health, or financial position. Over time, increases or decreases in the City's net position are one indicator of whether its financial health is improving or deteriorating.

In the Statement of Net Position and the Statement of Activities, we report the activities of the City as follows:

- Governmental activities Most of the City's basic services are reported here. Property and sales taxes and state and federal grants finance most of these activities.
- Business-type activities The City charges a fee to "customers" to help cover all or most of the cost of services it provides for water, sewer, and garbage services.

Reporting the City's Most Significant Funds

Fund Financial Statements

The fund financial statements provide detailed information about the most significant funds – not the City as a whole. The City establishes funds to help control and manage money for particular purposes. The City's two types of funds, governmental and proprietary, use different accounting approaches.

- Governmental funds Most of the City's basic services are reported in governmental funds, which focus on how money flows into and out of those funds and the balances left at year-end that are available for spending. These funds are reported using an accounting method called modified accrual accounting, which measures cash and all other financial assets that can be readily converted to cash. The governmental fund statements provide a detailed short-term view of the City's general governmental operations and the basic services it provides. Governmental fund information helps you determine whether there are more or fewer financial resources that can be spent in the near future to finance the City's programs. We describe the relationship (or differences) between governmental activities (reported in the Statement of Net Position and the Statement of Activities) and governmental funds in reconciliation at the bottom of the fund financial statements.
- Proprietary funds The City reports the activities for which it charges users in proprietary funds using the same accounting methods employed in the Statement of Net Position and the Statement of Activities. The City's proprietary fund is included in the business-type activities reported in the government-wide statements.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

Our analysis focuses on the Statement of Net Position (Table 1) and Changes in Net Position (Table 2) of the City's governmental and business-type activities.

As seen in Table 1, net position of the City's governmental activities increased by \$706,911, from \$1,140,167 in 2019 to \$1,847,078 in 2020. The increase in the governmental activities net position was primarily due to the excess of revenues over expenses in order for the City to assign money to capital projects.

The net position of the business-type activities increased by \$231,333 from \$4,875,074 in 2019 to \$5,106,407 in 2020. The increase in business-type activities net position was primarily due to the reduction in expenses caused by COVID-19 cutbacks.

As can be seen in Table 2 on the next page, total revenues (excluding transfers) from governmental activities increased by \$438,060 from \$1,367,004 in 2019 to \$1,805,064 in 2020 primarily due to an increase in grant revenue. Total expenses from governmental activities increased by \$75,849 primarily due to an increase in the police department salaries.

Total revenues (excluding transfers) from business-type activities increased by \$294,749 from \$881,615 in 2019 to \$1,176,364 in 2020 primarily due to an increase in grant revenue. Total expenses from business-type activities decreased by \$149,325 from \$1,052,421 in 2019 to \$903,096 in 2020 primarily due to a decrease in salary and supplies costs.

THE CITY'S FUNDS

As of September 30, 2020, the governmental funds reported a fund balance of \$1,478,532. This is an increase of \$153,543 from \$1,324,990 as of September 30, 2019.

General Fund Budgetary Highlights

The City's Council annually adopts an operating budget. Total actual revenues were \$523,347 more than budgeted, primarily due to higher than anticipated grant revenue.

Actual expenditures were over budget by \$404,850, primarily due to construction projects funded by the unanticipated grant revenues.

In total, the actual net increase in fund balance was \$164,589, compared to a budgeted increase of \$10,373 for 2020.

Capital Assets

As of September 30, 2020, the City had \$5,397,863 invested in capital assets.

Note 1. Summary of Significant Accounting Policies

The City of Somerville, Texas, is a municipal corporation incorporated under Article XI, Section 4 of the Constitution of the State of Texas. The City provides the following services: public safety (police and fire), public works, community services, water and sewer services, solid waste and general administrative services.

The City's financial statements are prepared in accordance with generally accepted accounting principles (GAAP). The Governmental Accounting Standards Board (GASB) is responsible for establishing GAAP for state and local governments through its pronouncements (Statements and Interpretations). The more significant policies established in GAAP and used by the City are discussed below.

A. Financial Reporting Entity

In evaluating how to define the City for financial reporting purposes, management has considered all potential component units. The decision to include a potential component unit in the reporting entity was made by applying the criteria set forth in GASB Statement No. 61. As defined by GASB 61, component units are legally separate entities that are included in the City's reporting entity because the City is financially accountable or closely related.

In 2016, Somerville Parks Association, a non-profit organization was formed as a 501(c)(3) organization to support the City of Somerville in implementing and conducting its charitable and educational projects to raise funds for community projects. For financial reporting purposes, Somerville Parks Association is reported as a blended component unit and non-major special revenue fund in the governmental funds.

B. Basis of Presentation

Government-wide financial statements

The Statement of Net Position and Statement of Activities display information about the reporting government as a whole. They include all funds of the reporting entity except for fiduciary funds. The statements distinguish between governmental and business-type activities. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange revenues. Business-type activities are financed in whole or in part by fees charged to external parties for goods or services.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segments are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific program. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services or privileges provided by a given program and 2) operating or capital grants and contributions that are restricted to meeting the operational or capital requirements of a particular program.

Taxes and other items not properly included among program revenues are reported instead as general revenues.

Fund financial statements

Fund financial statements of the reporting entity are organized into funds, each of which is considered to be separate accounting entities. Each fund is accounted for by providing a separate set of self-balancing accounts that constitute its assets, liabilities, fund equity, revenues, and expenditures/expenses. Funds are organized into two major categories: governmental and proprietary. An emphasis is placed on major funds within the governmental and proprietary categories. A fund is considered major if it is the primary operating fund of the City or meets the following criteria:

- a. Total assets, liabilities, revenues, or expenditures/expenses of that individual governmental or enterprise fund are at least 10 percent of the corresponding total for all funds of that category or type; and
- b. Total assets, liabilities, revenues, or expenditures/expenses of the individual governmental fund or enterprise fund are at least 5 percent of the corresponding total for all governmental and enterprise funds combined.

The funds of the financial reporting entity are described below:

Governmental Funds

General Fund

The General Fund is the primary operating fund. It accounts for all financial resources of the general government, except those legally or administratively required to be accounted for in other funds.

Debt Service Fund

The Debt Service Fund is used to account for the accumulation of resources for and the payment of general long-term debt principal, interest and related costs.

Proprietary Fund

Water, Sewer and Sanitation Fund

The Water, Sewer, and Sanitation Fund is used to account for operations (a) that are financed and operated in a manner similar to private business enterprises – where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods and services to the general public on a continuing basis be financed or recovered primarily through user charges; or (b) where the governing body has decided that periodic determination of revenue earned, expenses incurred and/or net income is appropriate for

capital maintenance, public policy, management control, accountability or other purposes.

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. Operating expenses for the proprietary funds include the cost of personal and contractual services, supplies and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

Special Revenue Funds

The Special Revenue Funds are used to account for revenue sources that are legally restricted to expenditures for specific purposes. The City's non-major special revenue funds include Senior Citizens Center, Hotel/Motel, Court Technology, Court Security, and Senior Citizens Activity.

C. Measurement Focus and Basis of Accounting

Measurement focus is a term used to describe which transactions are recorded within the various financial statements. Basis of accounting refers to when transactions are recorded regardless of the measurement focus applied.

Measurement Focus

On the government-wide Statement of Net Position and the Statement of Activities, both governmental and business-like activities are presented using the economic resources measurement focus as defined in item b. below.

In the fund financial statements, the "current financial resources" measurement focus or the "economic resources" measurement focus is used as appropriate:

- a. All governmental funds utilize a "current financial resources" measurement focus. Only current financial assets and liabilities are generally included on their balance sheets. Their operating statements present sources and uses of available spendable financial resources during a given period. These funds use fund balance as their measure of available spendable financial resources at the end of the period.
- b. The proprietary fund utilizes an "economic resources" measurement focus. The accounting objectives of this measurement focus are the determination of operating income, changes in net position (or cost recovery), financial position, and cash flows. All assets and liabilities (whether current or noncurrent) associated with their activities are reported. Proprietary fund equity is classified as net position.

Basis of Accounting

In the government-wide Statement of Net Position and Statement of Activities, both governmental and business-like activities are presented using the accrual basis of accounting. Under the accrual basis of accounting, revenues are recognized when earned and expenses are recorded when the liability is incurred or economic asset used. Revenues, expenses, gains, losses, assets, and liabilities resulting from exchange and exchange-like transactions are recognized when the exchange takes place.

In the fund financial statements, governmental funds are presented on the modified accrual basis of accounting. Under this modified accrual basis of accounting, revenues are recognized when "measurable and available." Measurable means knowing or being able to reasonably estimate the amount. Available means collectible within the current period or within sixty days after year end. Expenditures (including capital outlay) are recorded when the related fund liability is incurred, except for general obligation bond principal and interest which are reported when due.

The proprietary fund utilizes the accrual basis of accounting. Under the accrual basis of accounting, revenues are recognized when earned and expenses are recorded when the liability is incurred or economic asset is used.

D. Budgets

Annual appropriated budgets are adopted for the general and enterprise funds. The budget for the general fund is prepared and adopted on a basis consistent with generally accepted accounting principles, which is the same basis of accounting used for financial reporting in these financial statements. Budgets are adopted by passage of a budget ordinance. All annual budget appropriations lapse at fiscal year-end.

Encumbrance accounting is a system under which purchase orders, contracts, and other commitments for the expenditure of funds are recorded to reserve that portion of the applicable appropriation. Encumbrances are reported as reservations of fund balances since they do not constitute expenditures or liabilities. The City does not employ encumbrance accounting as it feels its current system is adequate to assure effective budgetary control and accountability and to facilitate effective cash planning and control.

E. Cash and Investments

For the purpose of the Statement of Net Position and the Statement of Cash Flows, "Cash and cash equivalents" consists of cash on hand, amounts in demand deposit accounts and interest-bearing checking accounts, as well as certificates of deposits with maturities of three months or less.

State statutes authorize the City to invest in time deposits of its designated depositories, U.S. Government Securities, and investment pools managed by the state. Investments are carried at fair value which is based on quoted market prices. Interest income and changes in fair value are reported as investment income.

F. Short-Term Interfund Receivables/Payables

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. Any residual balances are classified as "due from other funds" and "due to other funds," respectively, on the balance sheet and statement of Net Position.

G. Restricted Assets

Amounts in governmental funds which are legally identified for specific purposes either by City ordinance or contractual obligation are reflected as restricted assets. When an expense is incurred for purposes for which both restricted and unrestricted net position are available, restricted resources are used first to fund the expense.

H. Capital Assets

The accounting treatment over property, plant, and equipment (capital assets) depends on whether the assets are used in governmental fund operations or proprietary fund operations and whether they are reported in the government-wide or fund financial statements.

Government-wide statements

All capital assets are valued at historical cost or estimated historical cost if actual is unavailable, except for donated capital assets which are recorded at their estimated fair value at the date of donation. Interest incurred during construction is not capitalized. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized. Improvements are capitalized and depreciated over the remaining useful lives of the related capital assets, as applicable.

Depreciation of all exhaustible capital assets is recorded as an allocated expense in the Statement of Activities, with accumulated depreciation reflected in the Statement of Net Position. Depreciation is provided over the assets' estimated useful lives using the straight-line method of depreciation. The range of estimated useful lives by type of asset is as follows:

Buildings and improvements	20 - 50 years
Utility lines/water wells	40 years
Infrastructure	40 - 50 years
Machinery and equipment	5 - 10 years

When capital assets are disposed of, the cost and related accumulated depreciation are removed from the accounts and the appropriate gain or loss is recognized.

Fund financial statements

In the fund financial statements, capital assets used in governmental operations are accounted for as capital outlay expenditures of the governmental fund upon acquisition. Capital assets used in proprietary fund operations are accounted for the same as in the government-wide statements.

I. Compensated Absences

It is the City's policy to permit employees to accumulate earned but unused vacation and sick pay benefits. There is no liability for unpaid accumulated sick leave since the City does not have a policy to pay any amounts when employees separate from service with the City. All vacation pay is accrued when incurred in the government-wide financial statements.

J. Long-term Obligations

The accounting treatment of long-term debt depends on whether the assets are used in governmental fund operations or proprietary fund operations and whether they are reported in the government-wide or fund financial statements.

All long-term debt to be repaid from governmental and business-type resources is reported as liabilities in the government-wide statements. The long-term debt consists primarily of bonds payable, notes payable, leases payable, and compensated absences.

Long-term debt for governmental funds is not reported as liabilities in the fund financial statements. The debt proceeds are reported as other financing sources and payment of principal and interest reported as expenditures. The accounting for the proprietary fund is the same in the fund statements as it is in the government-wide statements.

I. Fund Equity

Government-wide statements

Equity is classified as Net Position and displayed in three components:

a. Net investment in capital assets – Consists of capital assets including restricted capital assets, net of accumulated depreciation and reduced by the outstanding balances of any bonds, mortgages, notes or other borrowings that are attributable to the acquisition, construction, or improvement of those assets.

- b. Restricted Net Position consists of net position with constraints placed on the use either by (1) external groups such as creditors, grantors, contributors, or laws or regulation of other governments; or (2) law through constitutional provisions or enabling legislation.
- c. Unrestricted Net Position all other net position that do not meet the definition of "restricted" or "invested in capital assets, net of related debt."

Classification of fund balances

The *nonspendable* fund balance includes the portion of net resources that cannot be spent because of their form or because they must be maintained intact. Resources not in spendable form include supplies inventories and prepaid items, long-term advances to other funds net of deferred interest revenue, long-term receivable net of deferred interest revenue, nonfinancial assets held for resale, and unrealized change in the fair value of investments.

Some resources are spendable but are legally or contractually required to be maintained intact. Such resources include the principal of an endowment.

The *restricted* fund balance includes net resources that can be spent only for the specific purposes stipulated by constitution, external resource providers (creditors, grantors, contributors), laws and regulations of other governments, or through enabling legislation. The enabling legislation authorizes the City to assess, levy, charge or otherwise mandate payment of resources from external resource providers; those resources can be used only for the specific purposes stipulated in the legislation. The City's revenue generated through enabling legislation includes certain municipal court fees.

The *committed* fund balance includes spendable net resources that can only be used for specific purposes pursuant to constraints imposed by formal Council actions, no later than the close of the fiscal year. Those constraints remain binding unless removed or changed in the same manner employed to previously commit those resources.

The assigned fund balance includes amounts that are constrained by the City's intent to be used for specific purposes, but are neither restricted nor committed. Such intent should be expressed by the City Council or its designated officials to assign amounts to be used for specific purposes, but are neither restricted nor committed. Constraints imposed on the use of assigned amounts can be removed with no formal Council actions. The assigned fund balance is only reported in the General Fund.

The *unassigned* fund balance represents spendable net resources that have not been restricted, committed, or assigned to specific purposes.

Spending Prioritization in Using Available Resources

When both restricted resources and other resources (i.e., committed, assigned, and unassigned) can be used for the same purpose, the City budget considers restricted resources to be spent first.

When committed, assigned, and unassigned resources can be used for the same purpose, the flow assumption in the City budget is to spend in the sequence of committed resources first, assigned second, and unassigned last.

L. Interfund Transfers

Quasi-external transactions are accounted for as revenues, expenditures or expenses. Transactions that constitute reimbursements to a fund for expenditures/expenses initially made from it that are properly applicable to another fund are recorded as expenditures/expenses in the reimbursing fund and as reductions in expenditures/expenses in the fund that is reimbursed.

All other interfund transactions, except quasi-external transactions and reimbursements, are reported as transfers. Nonrecurring or nonroutine permanent transfers of equity are reported as residual equity transfers. All other interfund transfers are reported as operating transfers.

M. Pensions

For purposes of measuring the net pension liability/asset, deferred outflows of resources and deferred inflows of resources related to pension expense, information about the Fiduciary Net Position of the Texas Municipal Retirement System (TMRS) and additions to/deductions from TMRS's Fiduciary Net Position have been determined on the same basis as they are reported by TMRS. For this purpose, plan contributions are recognized in the period that compensation is reported for the employee, when contributions are legally due. Benefit payments and refunds are recognized when due and payable in accordance in accordance with the benefit terms. Investments are reported at fair value.

Note 2. Legal Compliance - Budgets

The City's Mayor has ultimate responsibility for the budget and formulates the budget goals for the City under the direction of the City Council. In compliance with the state's uniform budget law, the Mayor files the proposed budget with the City Secretary and City Council before the 30th day prior to the date the City adopts its tax levy for the fiscal year. The City is required to publish a notice of a public hearing regarding the proposed budget and then hold that public hearing not less than 15 days after the budget is filed with the City Secretary and prior to the date the Council makes the tax levy. Once the hearing is concluded and before adoption of the proposed budget, the Council may make any changes it considers warranted

by law or in the best interest of the taxpayers. The annual operating budget is then adopted through passage of an annual budget ordinance. Upon approval by the Council, the annual budget document becomes a matter of public record and is filed with the City Secretary.

The legal level of budgetary control is the fund; therefore, expenditures may not legally exceed budget appropriations at the fund level. To amend the total of a fund or to reclass line items within the fund, a budget amendment approved by the Council is required. The general fund, debt service fund, and the enterprise fund have legally adopted annual budgets. During the year, the City did not amend the budget.

Note 3. Deposits and Investments

Custodial credit risk is the risk that in the event of a bank failure, the City's deposits may not be returned to it. The City does not have a deposit policy for custodial credit risk. Deposits of the City are insured or collateralized with securities held by the City, its agent, or by the pledging financial institution's trust department or agent in the name of the City or applicable public trust. Deposits were adequately covered at September 30, 2020.

Note 4. Restricted Assets

At September 30, 2020, restrictions on cash and investments were as follows:

	Go	Governmental		Proprietary	
Cash and Investments		Fund		Fund	
Restricted for:	1				
Somerville Park Association	\$	354	\$	-	
Hotel/Motel occupancy tax		25,874		-	
Municipal court		73,283		_	
Debt service		100,060		₩	
Senior Citizens Center		4,215		_	
Equipment and improvements		-		3,932	
	\$	203,786	\$	3,932	

Note 5. Receivables

Receivables at September 30, 2020, consist of the following:

Governmental	Proprietary	
Fund	Fund	Total
\$ 100,052	\$ -	\$100,052
51,051	1-1	51,051
2,500	-	2,500
119,409	33,205	152,614
-	102,483	102,483
	(973)	(973)
\$ 273,012	\$134,715	\$407,727
	Fund \$ 100,052 51,051 2,500 119,409 -	Fund Fund \$ 100,052 \$ - 51,051 - 2,500 - 119,409 33,205 - 102,483 - (973)

Property taxes attach as an enforceable lien on property as of February 1. Taxes are levied on October 1 and are payable by January 31, after which time they become delinquent and penalties and interest may be assessed by the City.

Note 6. Risk Management

The City is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters for which the City carries commercial insurance.

Note 7. Capital Assets

Capital asset activity for the year ended September 30, 2020, was as follows:

	Beginning Balance	Additions/ Completions	Retirements/ Adjustments	Ending Balance
Governmetnal activities	Dalarice	Competions	Adjustricits	Bamice
Capital assets not being depreciated				
Land	\$ 46,493	\$ -	\$ -	\$ 46,493

The City entered into a lease agreement for copier equipment. This lease commitment qualifies as a capital lease for accounting purposes. The copier equipment is recorded at \$21,784, the fair value of the lease assets at the inception of the lease. Accumulated depreciation on the copier equipment totaled \$1,815 at September 30, 2020. The lease payable is due in monthly installments of \$506 through March 2025 and cannot be terminated early. The monthly lease installment includes approximately \$42 of maintenance expense.

The following is a schedule of the future value and net present value of minimum lease payments under the capital lease at September 30, 2020.

	~	~
Minimum	ease	Payments

1711111	mum Dease I ayı.	1101113	
Fiscal Year Ending	Lease	Maintenance	
September 30,	Portion	Portion	Total
2021	\$ 5,568	\$ 504	\$ 6,072
2022	5,568	504	6,072
2023	5,568	504	6,072
2024	5,568	504	6,072
2025	2,784	252	3,036
	25,056	2,268	27,324
Less amount			
representing interest	4,991		
Present value of			
minimum lease payments	\$ 20,065		

Note 9. Interfund Transfers

Interfund transfers during the year ended September 30, 2020, were as follows:

		Transfers Out											
Transfers In	G	eneral	Proprietary		Speci	al Revenue							
General	\$	-	\$	41,935	\$	4,200							
Total	\$	-	\$	41,935	\$	4,200							

Note 10. Pension Plans

A. Plan Description

The City participates as one of 888 plans in the nontraditional, joint contributory, hybrid defined benefit pension plan administered by the Texas Municipal Retirement System (TMRS). TMRS is an agency created by the State of Texas and administered in accordance with the TMRS Act, Subtitle G, Title 8, Texas Government Code (the TMRS Act) as an agency multiple-employer retirement system for municipal employees in the State of Texas. The TMRS act places the general administration and management of the System with a six-member Board of Trustees. Although the Governor, with the advice and sent of the Senate, appoints the Board, TMRS is not fiscally dependent on the State of Texas. TMRS' defined benefit pension plan is a tax-qualified plan under 401(a) of the Internal Revenue Code. TMRS issues a publicly available comprehensive annual financial report (CAFR) that can be obtained at www.tmrs.com.

All eligible employees of the city are required to participate in TMRS.

B. Benefits Provided

TMRS provides retirement, disability, and death benefits. Benefit provisions are adopted by the governing body of the city, within the options available in the state statues governing TMRS.

At retirement, the benefit is calculated as if the sum of the employee's contributions, with interest, and the city-financed monetary credits with interest were used to purchase an annuity. Members may choose to receive their retirement benefits in one of seven payment options. Members may also choose to receive a portion of their benefit as a Partial Lump Sum Distribution in an amount equal to 12, 24, or 36 monthly payments, which cannot exceed 75% of the member's deposits and interest.

Plan provisions for the City were as follows:

	2018	2019
Employee Deposit rate	5%	5%
Matching Ratio (City to Employee)	1.5 to 1	1.5 to 1
A member is vested after	5 years	5 years
Service retirement eligibility		
(expressed as age/years of service)	60/5, 0/25	60/5, 0/25
Updated Service Credit	100% repeating,	100% repeating,
opulated Service Credit	transfers	transfers
Annuity Increase (to retirees)	70% of CPI	70% of CPI
runding morease (to remees)	repeating	repeating

Members can retire at certain ages, based on the years of service with the City. The Service Retirement Eligibilities for the City are: 5 years/age 60, 25 years/any age.

Employees covered by benefit terms.

At December 31, 2019 valuation and measurement date, the following employees were covered by the benefit terms:

Inactive employees or beneficiaries currently receiving benefits	13
Inactive employees entitled to but not yet receving benefits	19
Active employees	15

C. Contribution

The contribution rates for employees in TMRS are either 5%, 6%, or 7% of employee gross earnings, and the city matching percentages are either 100%, 150%, or 200%, both as adopted by the governing body of the city. Under the state law governing TMRS, the contribution rate for each city is determined annually by the actuary, using the Entry Age Normal (EAN) actuarial cost method. The actuarially determined rate is the estimated rate necessary to finance the cost of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability.

Employees for the City were required to contribute 5% of their annual gross earnings during the fiscal year. The contribution rates for the City were 4.25% and 5.21% in calendar years 2019 and 2020, respectively. The City's contributions to TMRS for the year ended September 30, 2020, were \$30,767, and were equal to the required contributions.

D Net Pension Liability/Asset

The City's Net Pension Liability/Asset (NPL/NPA) was measured as of December 31, 2019, and the Total Pension Liability/Asset used to calculate the Net Pension Liability/Asset was determined by an actuarial valuation as of that date.

Actuarial assumptions:

The Total Pension Liability in the December 31, 2019 actuarial valuation was determined using the following actuarial assumptions:

Inflation 2.5% per year Overall payroll growth 2.75% per year

Investment rate of return 6.75%, net of pension plan investment expense, including inflation

Salary increases were based on a service-related table. Mortality rates for active members, retirees, and beneficiaries were based on the gender-distinct RP2000 Combined Healthy Mortality Table, with male rates multiplied by 109% and female rates multiplied by 103%.

For cities with fewer than twenty employees, more conservative methods and assumptions are used. First, lower termination rates are used for smaller cities, with maximum multipliers of 75% for employers with less than 6 members, 85% for employers with 6 to 10 members, and 100% for employers with 11 to 15 members and 110% for employers with less than 100 members.

There is also a load on the life expectancy for employers with less than 15 active members. The life expectancy will be loaded by decreasing the mortality rates by 1% for every active member less than 15. For example, an employer with 5 active members will have the baseline mortality tables multiplied by 90% (10 active members times 1%). The rates are projected on a fully generational basis by scale BB to account for future mortality improvements. For disabled annuitants, the gender-distinct RP2000 Disabled Retiree Mortality Table is used, with slight adjustments.

Actuarial assumptions used in the December 31, 2019, valuation were based on the results of actuarial experience studies. The experience study in TMRS was for the period December 31, 2014 through December 31, 2018, first used in the December 31, 2019 valuation. Healthy post-retirement mortality rates and annuity purchase rates were updated based on a Mortality Experience Investigation Study covering 2009 through 2011, and dated December 31, 2013. These assumptions were first used in the December 31, 2013 valuation, along with a change to the Entry Age Normal (EAN) actuarial cost method.

Assumptions are reviewed annually. Plan assets are managed on a total return basis with an emphasis on both capital appreciation as well as the production of income, in order to satisfy the short-term and long-term funding needs of TMRS.

The long-term expected rate of return on pension plan investments is 6.75%. The pension plan's policy in regard to the allocation of invested assets is established and may be amended by the TMRS Board of Trustees. Plan assets are managed on a total return basis with an emphasis on both capital appreciation as well as the production of income, in order to satisfy the short-term and long-term funding needs of TMRS.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. In determining their best estimate of a recommended investment return assumption under the various alternative asset allocation portfolios, GRS focused on the area between (1) arithmetic mean (aggressive) without an adjustment for time (conservative) and (2) the geometric mean (conservative) with an adjustment for time (aggressive). The target allocation and best estimates of real rates of return for each major asset class in fiscal year 2020 are summarized in the following table.

		Long-Term Expected Real Rate of
Asset Class	Target Allocation	Return (Arithmetic)
Domestic Equity	17.5%	4.30%
International Equity	17.5%	6.10%
Core Fixed Income	10.0%	1.00%
Non-Core Fixed Income	20.0%	3.39%
Real Return	10.0%	3.78%
Real Estate	10.0%	4.44%
Absolute Return	10.0%	3.56%
Private Equity	5.0%	7.75%
Total	100.0%	

Discount Rate

The discount rate used to measure the Total Pension Liability/Asset was 6.75%. The projection of cash flows used to determine the discount rate assumed that employee and employer contributions will be made at the rates specified in the statute. Based on that assumption, the pension plan's Fiduciary Net Position was projected to be available to make all projected future benefit payments of current active and inactive employees.

Therefore, the long-term expected rate of return on plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability/Asset.

Increase (Decrease)

Pension Plan Fiduciary Net Position

Detailed information about the pension plan's Fiduciary Net Position is available in a separately-issued TMRS financial report. That report may be obtained on the Internet at www.tmrs.com.

E. Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For the year ended September 30, 2020, the City recognized pension expense (benefit) of (\$6,857).

At September 30, 2020, the City reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	red Outflows Resources	Deferred Inflows of Resources			
Differences between expected and actual economic experience	\$ 9,095	\$	15,122		
Change in actuarial assumptions	576		-		
Differences between projected and actual investment earnings	-		43,279		
Contributions subsequent to the measurement date	 23,380		-		
Total	\$ 33,051	\$	58,401		

Contributions of \$23,380 made subsequent to the measurement date are reported as deferred outflows of resources related to pensions and will be recognized as a reduction of the net pension liability for the year ending September 30, 2021. Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in pension expense as follows:

Year ended Decer	nber 31	:
2020	\$	(20,902)
2021		(9,821)
2022		3,071
2023		(21,078)
Thereafter		-
Total	\$	(48,730)

Note 11. Contingent Liabilities

Amounts received or receivable from grantor agencies are subject to audit and adjustment by grantor agencies. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount, if any, of expenditures which

may be disallowed by the grantor cannot be determined at this time although the City expects such amounts, if any, to be immaterial.

In the course of operations, the city is subject to litigation from time to time. Although the amount of any liability with respect to such litigation cannot be determined, in the opinion of management, such liability will not have a material adverse effect on the City's financial condition.

Note 12. Commitments

In 2015, the City entered into a 60-month agreement for a copier. Rental expense for the copier under this lease was \$1,913 in 2020. As described in Note 8, when the 2015 lease expired, a new 60-month lease was obtained and is classified as a capital lease.

Note 13. Related Party Transactions

In 2020, the City paid \$8,907 to a Council member's business.

Note 14. Net Investment in Capital Assets

In the prior years, long-term debt was issued by the General fund for the purchase and construction of Enterprise fund capital assets. The portion of debt related to the Enterprise fund capital assets is not deducted in the calculation of the amount of net investment in capital assets for governmental or business-type activities. However, this amount is included in the calculation of net investment in capital assets for the primary government as a whole.

Note 15. Coronavirus

The Coronavirus (COVID-19) pandemic has impacted the nation as a whole, leading to consumer uncertainties and financial setbacks for many businesses and individuals. During the year ended September 30, 2020, the City was eligible for \$83,105 in funding of which was received subsequent to year end. The funds received has been reflected as grant revenue in the accompanying financial statements.

Note 16. Subsequent Events

In December 2020, the Council approved the financing of a police department vehicle in the amount of \$54,515.

In December 2020, the Council approved a contract for the resurfacing of 11th Street and Avenue C in the amount of \$35,000.

In December 2020, the Council approved a contract related to the Anita Heights Subdivision in the amount of \$166,487.

In May 2021, the Council approved the purchase of property on 9th Street in the amount of \$132,000.
