# Summary

The National Citizen Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. The NCS captures residents’ opinions within the three pillars of a community (Community Characteristics, Governance and Participation) across eight central facets of community (Safety, Mobility, Natural Environment, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement). This report summarizes Victoria’s performance in the eight facets of community livability with the “General” rating as a summary of results from the overarching questions not shown within any of the eight facets. The “Overall” represents the community pillar in its entirety (the eight facets and general).

By summarizing resident ratings across the eight facets and three pillars of a livable community, a picture of Victoria’s community livability emerges. Below, the color of each community facet summarizes how residents rated each of the pillars that support it – Community Characteristics, Governance and Participation. When most ratings were higher than the benchmark, the color is the darkest shade; when most ratings were lower than the benchmark, the color is the lightest shade. A mix of ratings (higher and lower than the benchmark) results in a color between the extremes.

Ratings for most facets across the three pillars of community livability tended to be similar to those given in other communities across the nation. In Community Characteristics, ratings for Safety and Natural Environment were higher than the benchmark, while those for Recreation and Wellness were lower. Evaluations for Community Engagement within the pillar of Governance were also below average. Levels of Participation within Built Environment were higher than those observed elsewhere, while participation rates within Mobility were lower. This information can be helpful in identifying the areas that merit more attention.

Figure 1: Dashboard Summary

	Community Characteristics			Governance			Participation		
	Higher	Similar	Lower	Higher	Similar	Lower	Higher	Similar	Lower
Overall	13	30	9	4	34	8	8	21	7
General	3	4	0	0	3	0	0	3	0
Safety	2	1	0	1	6	0	1	1	1
Mobility	3	3	2	3	4	1	0	1	2
Natural Environment	3	0	0	0	6	0	1	2	0
