| 1.4 List of Land Development Code Amendments        | 1-19 |

**ARTICLE 1****GENERAL PROVISIONS****1.01.0 TITLE**

This Code shall be entitled the “Land Development Code” and may be referred to herein as the “Code”.

**1.02.00 AUTHORITY**

This Land Development Code is enacted pursuant to the requirements and authority of Chapter 163.3202, Florida Statutes, (the Local Government Comprehensive Planning and Land Development Regulation Act), the City of Freeport Charter effective May 13, 1975, and the general powers in Chapter 166/125, Florida Statutes (City of Freeport Government).

**1.03.0 APPLICABILITY****1.03.01 General Applicability**

Except as specifically provided below, the provisions of this Code shall apply to all development in the City of Freeport, and no development shall be undertaken without prior authorization pursuant to this Code.

**1.03.02 Consistency with Plan**

Nothing in this Part shall be construed to authorize development that is inconsistent with the City of Freeport’s comprehensive plan.

**1.04.00 DEVELOPMENT REVIEW PROCEDURES**

The development review process is that process by which the design of the development is reviewed to determine whether it complies with the requirements of the Code.

Development plan review is required for virtually all development activity, except the construction of a dwelling on a lot of record, and other very minor development activity such as the installation of a sign or the removal of a protected tree as shown in the flow charts below, there are three levels of Development Review & Approval.

- A. Less-Than Minor Development Process: “Less-Than- Minor development activities are reviewed administratively by the Technical Review Committee. Examples of Less-Than Minor activities include parking lot revisions or expansions which are not part of a development proposal, stormwater revisions which are not part of a development proposal, landscaping revisions,

and other similar activities. The process for approval of a Less-Than-Minor development project is shown on Table 1.1 below:

|   |  |
|---|--|
| Table 1.1 Less-Than-Minor Development Process |  |
| Pre-Application Conference                    |  |
| Project Submittal                             |  |
| Technical Review                              |  |
| Review Fees Paid                              |  |
| State permits signed /forwarded               |  |
| Less-Than-Minor Development Order Issued      |  |

B. Minor Development Process: Minor Development are classified as new developments which are:

1. 5 acres or less in combined land and water area; or
2. 9 or less dwelling units per acre or 99 or less dwelling units; or
3. 20,000 square feet or less of non-residential floor space; or
4. A phase of a previously approved development master plan or planned development project.

The process for approval of a Minor development project is shown on Table 1.2 below:

|                                     |  |   |
|-------------------------------------|--|---|
| Table 1.2 Minor Development Process |  |   |
| Pre-Submittal                       | Pre-Application Conference   |   |
| Preliminary Plans                   | Project Submittal  |   |
|                                     | Review for Completeness  |   |
|                                     | Technical Review   | Applicable Technical Reviewers per jurisdiction & expertise |
| Final Plans                         | Final Plans stamped by City Engineer   |   |
|                                     | Pre-Construction Conference  |   |
|                                     | Review Fees Paid   |   |
|                                     | State permits signed/forwarded   |   |
| Development Order Issued            | Clearing and Site Work Begins  |   |
|                                     | Non-Residential Projects: Tap & Impact Fees /Connection Fees/Deposits paid/Building Permits Issued |   |
| Platting                            | Residential Projects   | Impact Fees Paid prior to recording of Final Record Plat    |
|                                     |  | Tap Fees/Connection/Deposit paid at Building Permit         |

- C. Major Development Process: Major Developments are classified as new developments that:
1. That activity involves over 5 acres of combined land and water area; or
  2. A residential project with 10 or more units per acre or 100 or more dwelling units; or
  3. The development involves more than 20,000 square feet of non-residential floor space; or
  4. Any Development that the City Planning Director designates as Major because:
    - a. The proposed development is part of a larger parcel or project for which additional development is anticipated so that then aggregated, the project exceeds the limits of 2 or 3 above; or
    - b. The proposed development should be more thoroughly reviewed due to complexity, hazardousness, locations, PDP approval, Master Plan approval, etc.
    - c. The proposed development is likely to be controversial regardless of its size/scope.

| Final Plans                      | Pre-Construction Conference               | Final Plans stamped by City Engineer                            |
|                                  |   | Review Fees/Mitigation Paid                                     |
|                                  |   | State Permits signed/forwarded                                  |
|                                  | Development Order Issued                  | Clearing and Site Improvements                                  |
|                                  |   | Non-Residential Projects pay Tap/Impact Fees at Building Permit |
|                                  | Platting Process for Residential Projects | Impact Fees Paid prior to recording final plat                  |
| Tap Fees paid at Building Permit |   |   |

## **1.05.0 EXCEPTIONS**

### **1.05.01 Previously Issued Development Permits**

The provisions of this Code and any amendments there to shall not affect the validity of any lawfully issued and effective development permit if:

- A. The development activity authorized by the permit has been commenced prior to the effective date of this Code or any amendment thereto, or will be commenced after the effective date of this Code but within six (6) months of issuance of the building permit; and
- B. The development activity continues without interruption (except because of war or natural disaster) until the development is complete. If the development permit expires, any further development on that site shall occur only in conformance with the requirements of this Code or amendment thereto.

### **1.05.02 Previously Approved Development Orders**

Projects with development orders that have not expired at the time this Code or an amendment thereto is adopted, and on which development activity has commenced or does commence and proceeds according to the time limits in the regulations under which the development was originally approved, must meet only the requirements of the regulations in effect when the development plan was approved. If the development plan expires or is otherwise invalidated, any further development on that site shall occur only in conformance with the requirements of this Code or amendment thereto.

## **1.06.0 FINDINGS**

### **1.06.01 General Findings**

#### **A. Statutory Requirements**

Chapter 163, Florida Statutes, requires each Florida local government to enact a single land development code which implements and is consistent with the local comprehensive plan, and which contains all land development regulations for the City of Freeport.

#### **B General Public Need**

Controlling the location, design and construction of development within the City of Freeport is necessary to maintain and improve the quality of life in the City of Freeport as more fully described below.

**1.06.02 Specific Findings Relating to The Various Subject Areas of This Code**

With regard to the following specific subject areas of this Code, the City of Freeport Council finds:

**A. Administration and Enforcement**

1. A single set of administrative procedures for making all land use decisions promotes efficiency, predictability, and citizen participation.
2. All development proposals should undergo a development review process to assure compliance with the requirements of this Code.
3. A mandatory pre-application conference requirement enhances communication and understanding between the City of Freeport and the Developer thereby improving the efficiency of the development review process.
4. Developments of large potential impact on the community should go through a more rigorous review process than others.
5. Review of planning decisions should be independent of review of land development decisions to avoid ad hoc planning on a site-by-site basis.
6. All administrative decisions should be supported by a record with written findings to assure accountability and efficient appellate review.
7. A quick, efficient and non-political avenue of appeal should be available for all ministerial and administrative decisions.
8. Enforcement of development orders and the provisions of this Code should be through procedures that are efficient, effective and consistent with the code enforcement procedures established by state law.

**B. Signs**

1. The manner of the erection, location and maintenance of signs affects the public health, safety, and welfare of the people of this community.

2. The safety of motorists, cyclists, pedestrians, other users of the public streets is affected by the number, size, location, lighting and movement of signs that divert the attention of drivers.
3. The size and location of signs may, if uncontrolled, constitute an obstacle to effective fire-fighting techniques.
4. The construction, erection and maintenance of large signs suspended from or placed on the tops of buildings, walls or other structures may constitute a direct danger to pedestrian and vehicular traffic below, especially during periods of strong winds.
5. Uncontrolled and unlimited signs may degrade the aesthetic attractiveness of the natural and manmade attributes of the community and thereby undermine the economic value of tourism, visitation and permanent economic growth.

**C. Landscaping and Tree Protection**

1. Landscaping and buffering development with trees and other vegetation promotes the health, safety and welfare of the community to such an extent as to justify the imposition of landscaping and buffering requirements.
2. Trees and landscaping benefit the community by:
  - a. Absorbing carbon dioxide and returning oxygen to the atmosphere;
  - b. Precipitating dust and other particulates from the air;
  - c. Providing wildlife habitat, particularly for birds which in turn help control insects;
  - d. Providing soil stabilization which reduces erosion and mitigates the effect of flooding;
  - e. Providing shade which reduces energy consumption and glare, and making outdoor areas more comfortable during the warm months.
  - f. Making the built environment more attractive by adding a variety of color, shape and pattern and thus increasing community pride and the value of property;
  - g. Providing attractive buffering between incompatible land uses; and
  - h. Abating noise.
3. Because native vegetation is adapted to local diseases, pests, soil and climate, it is generally more economical and desirable than exotic species which require more pesticide, fertilizer and water.

4. Exotic vegetation can crowd out native vegetation, use more water, and damage the environment from increased use of fertilizers and pesticides.
5. Because some trees are more beneficial than others, the public benefits of tree protection may be obtained without preserving each and every tree.

**D. Off-Street Parking and Loading**

1. Off-street parking and loading of vehicles promotes the public safety and welfare by reducing traffic congestion.
2. Well-designed off-street parking and loading areas promote the safe and efficient storage, loading and circulation of vehicles.
3. Deferring the construction of some parking areas pending determination of the actual need for parking spaces, and taking into account public demand and the size of vehicles to be parked, conserves open space and developable land, and reduces the expense and hazard of controlling stormwater runoff.
4. Allowing the use of porous paving materials and unpaved parking areas whenever possible conserves water and energy, moderates the microclimate, and reduces the expense and hazards of controlling storm water runoff.

**E. Stormwater Management**

1. Increased stormwater runoff may cause erosion and pollution of ground and surface water with a variety of contaminants such as heavy metals and petroleum products.
2. Stormwater runoff often contains nutrients, such as phosphorus and nitrogen, which adversely affect flora and fauna by accelerating eutrophication of receiving waters.
3. Erosion silts up water bodies, decreases their capacity to hold and transport water, interferes with navigation, and damages flora and fauna.
4. Installation of impervious surfaces increases the volume and rate of stormwater runoff and decreases groundwater recharge.

5. Improperly managed stormwater runoff increases the incidence and severity of flooding and endangers property and human life.
6. Improperly managed stormwater runoff alters the salinity of estuarine areas and diminishes their biological productivity.
7. Degradation of ground and surface waters imposes economic costs on the community.
8. Eighty to ninety-five percent of the total annual loading of most stormwater pollutants discharged into receiving waters are concentrated in the flush created by the first one inch of rainfall (“first flush”), and carried off-site in the first one-half inch of runoff.
9. Improperly managed stormwater adversely affects the drainage of off-site property.

**F. Floodplain Protection**

1. Flooding is a natural, recurring phenomenon in the City of Freeport.
2. Naturally flood-prone lands serve the following important functions in the regional hydrologic cycle and ecological system:
  - a. They provide natural storage and conveyance of flood waters.
  - b. They facilitate groundwater recharge.
  - c. They provide temporary storage of surface waters that moderate flood elevations and the timing, velocity and rate of flood discharges.
  - d. They reduce erosion, and filter nutrients, sediments, and other pollutants from flood waters.
  - e. They export detritus and other food sources to open water bodies and are vital habitat for fish, birds, wildlife and native plant communities.
3. Naturally occurring flooding may provide recharge to groundwater and a basic source of flow to surface waters.
4. The uncontrolled development of flood-prone lands substantially degrades the health, safety and welfare of the community in the following ways:

- a. The owners, residents, customers, guests, and employees occupying homes, businesses and other structures located in flood-prone areas are placed at unreasonable risk of personal injury and property damage.
- b. Expensive and dangerous search, rescue and disaster relief operations may be necessary when developed properties are flooded.
- c. Roads, public facilities, and utilities associated with development may be damaged by flooding at great expense to taxpayers and rate payers.
- d. Flooding of developed properties may lead to demands that the government construct expensive and environmentally damaging projects to control flood waters.
- e. Normally flood-free lands are placed at risk of flooding when flood waters on natural flood-prone areas are obstructed, diverted, displaced or channelized by development.
- f. Water quality is degraded, the supply of freshwater to estuaries is disrupted and habitat is lost.
- g. Property values are lowered and economic activity is disrupted by damaging floods.

**G. Protection of Environmentally Sensitive Lands**

1. Protection of environmentally sensitive lands described or mapped in the Conservation Element of the Comprehensive Plan promotes the well being of the people of the City of Freeport as described below and in the Conservation Element.
2. Wetlands serve the following beneficial functions:
  - a. Wetlands provide natural storage and conveyance of flood waters, and minimize erosion and sedimentation by reducing flood flows and the velocity of flood waters.
  - b. Coastal wetlands, and inland wetlands adjoining larger lakes and rivers, protect wildlife and the shoreline from destructive wave action.
  - c. Wetlands filter and help decompose sediments, nutrients, and other natural and man-made pollutants that would otherwise degrade surface and ground waters.
  - d. Wetlands support commercial and recreational fishing because they provide essential nutrients and hatcheries for aquatic life.
  - e. Wetlands provide habitat for rare and endangered species, and provide essential breeding and protective habitats for many other birds, mammals, and reptiles.

- f. Wetlands recharge ground and surface water.
3. Shorelines serve the following beneficial functions:
    - a. Land adjoining waters or wetlands, which can generally be divided into submergent, transitional, and upland vegetation zones, provides essential habitat for many plant and animal species, including species that are endangered, threatened, or of special concern.
    - b. Submergent, transitional, and upland vegetation zones serve as effective buffers against noise and other human activities which may have adverse affects on aquatic and wetland dependent wildlife.
    - c. Submergent, transitional, and upland vegetation zones help slow stormwater runoff flows and increase infiltration of water, nutrients, and other substances.
    - d. Submergent, transitional, and upland vegetation zones reduce predation by domestic pets on wetland and wetland dependent wildlife species.
  4. Agricultural and development activities have destroyed or impaired the beneficial functions of many environmentally sensitive lands in the City of Freeport.
  5. Federal and state regulations do not adequately protect environmentally sensitive lands, thus making local regulation necessary.

## **1.07.0 INTENT**

### **1.07.01 General Intent**

With regard to this Land Development Code in general, its provisions shall be construed and implemented to achieve the following intentions and purposes of the Freeport City Council:

- A. To establish the regulations, procedures and standards for review and approval of all proposed development in the City of Freeport.
- B. To foster and preserve public health, safety, comfort and welfare, and to aid in the harmonious, orderly, aesthetically pleasing and socially beneficial development of the City of Freeport in accordance with the Comprehensive Plan.
- C. To adopt a development review process that is:
  1. Efficient, in terms of time and expanse;

2. Effective, in terms of addressing the natural resources and public facility implications of proposed development; and
  3. Equitable, in terms of consistency with established regulations and procedures, respect for the rights of property owners, and consideration of the interests of the citizens of the City of Freeport.
- D. To implement the City of Freeport Comprehensive Plan as required by the “Local Government Comprehensive Planning and Land Development Regulation Act”.
- E. To provide specific procedures to ensure that development orders and permits are conditioned on the availability of public facilities and services that meet level of service requirements (concurrency).

### **1.07.02 Specific Intent Relating to The Various Subject Areas of This Code**

This provision of this Code dealing with the following specific subject areas shall be construed and implemented to achieve the following intentions and purposes of the Freeport City Council:

#### **A. Administration and Enforcement**

1. To assure that all development proposals be thoroughly and efficiently reviewed for compliance with the requirements of this Code, the City of Freeport Comprehensive Plan, and other applicable City of Freeport regulations.
2. To promote efficiency, predictability and citizen participation.
3. To assure compliance with approved development orders and the provisions of this Code through rigorous but fair enforcement actions.

#### **B. Signs**

1. To create a comprehensive and balanced system of sign control that accommodates both the need for a well-maintained, safe and attractive community, and the need for effective business identification, advertising and communication.
2. To permit signs that are:
  - a. Compatible with their surroundings.

- b. Designed, constructed, installed and maintained in a manner which does not endanger public safety or unduly distract motorists.
  - c. Appropriate to the type of activity to which they pertain.
  - d. Large enough to convey sufficient information about the owner or occupants of a particular property, the products or services available on the property, or the activities conducted on the property, and small enough to satisfy the needs for regulation.
  - e. Reflective of the identity and creativity of individual occupants.
3. To promote the economic health of the community through increased tourism and property values.

**C. Landscaping and Tree Protection**

1. To enhance the attractiveness of the community.
2. To conserve energy through the cooling and shading effects of trees.
3. To abate nuisances such as noise, glare, heat, air pollution and stormwater runoff.
4. To mitigate conflicts between adjoining land uses;
5. To preserve the environmental and ecological benefits of existing native trees and vegetation.
6. To promote safe and efficient use of off-street parking facilities and other vehicular use areas by:
  - a. Clearly delineating and buffering the bounds of vehicular use areas, particularly where they abut public rights of way, so that movement, noise, and glare in one area do not adversely distract activity in another area;
  - b. Limiting physical site access to established points of ingress and egress; and
  - c. Limiting the internal movement of vehicles and pedestrians to designated traffic configurations.
7. To preserve the community's irreplaceable natural heritage for existing and future generations.

**D. Parking and Loading**

To assure that all developments provide for adequate and safe storage and movement of vehicles in a manner consistent with community standards and good engineering and site design principals.

**E. Stormwater Management**

1. To protect and maintain the chemical, physical and biological integrity of ground and surface waters.
2. To prevent activities which adversely affect ground and surface waters.
3. To encourage the construction of stormwater management systems that aesthetically and functionally approximate natural systems.
4. To protect natural drainage systems.
5. To minimize runoff pollution of ground and surface waters.
6. To maintain and restore groundwater levels.
7. To protect and maintain natural salinity levels in estuarine areas.
8. To minimize erosion and sedimentation.
9. To prevent damage to wetlands.
10. To protect, maintain, and restore the habitat of fish and wildlife.

**F. Floodplain Protection**

1. To protect human life and health.
2. To minimize expenditure of public money for costly flood control projects.
3. To minimize the need for rescue and relief efforts associated with flooding and generally undertaken at public expense.
4. To minimize prolonged business interruptions and damage to public facilities and utilities caused by flooding.
5. To maintain a stable tax base by providing for the sound use and development of flood-prone areas.

6. To ensure that potential purchasers of subdivided land are notified that the property is in a flood-prone area.
7. To assure that uses and facilities vulnerable to floods are designed and constructed to resist flood damage.
8. To preserve natural floodplains, stream channels, and natural protective barriers to accommodate flood waters.
9. To limit filling, grading, dredging and other development which may increase erosion, sedimentation, or flood damage.
10. To maintain the normal movement of surface waters to lands that are normally flood free.
11. To maintain the normal movement of surface waters, the optimum storage capacity of watersheds, desirable groundwater levels, water quality, and the natural hydrological and ecological functions of wetlands and other flood prone lands.
12. To avoid the need of costly and environmentally disruptive flood management structures.
13. To encourage the use of flood-prone lands as open space.
14. To make the City of Freeport eligible for participation in the National Flood Insurance Program.

**G. Protection of Environmentally Sensitive Lands**

1. To protect environmentally sensitive lands and their beneficial functions while also protecting the rights of property owners.
2. To protect, maintain, and restore the chemical, physical, and biological integrity of ground and surface waters and natural habitats.
3. To prevent activities which adversely affect ground and surface waters, natural habitats, and native flora and fauna.
4. To maintain recharge for groundwater aquifers.
5. To prohibit certain uses that are detrimental to environmentally sensitive areas.

6. To protect the recreation opportunities of environmentally sensitive lands for hunting, fishing, boating, hiking, nature observation, photography, camping, and other uses.
7. To protect the public's rights in navigable waters.
8. To protect aesthetic and property values.

## **1.08.0 RELATIONSHIP TO COMPREHENSIVE PLAN**

### **1.08.01 Generally**

The adoption of a unified land development code implements the goals, policies and objectives listed in Part 1 of the Comprehensive Plan:

## **1.09.0 INCORPORATION BY REFERENCE**

### **1.09.01 Technical Construction Standards Manual**

Engineering standards and construction design specifications are contained in a Technical Construction Standards Manual which is hereby incorporated into this Code by reference as Appendix D.

### **1.09.02 Maps**

Maps showing zoning districts, conservation areas, overlay zones, and the like, are hereby incorporated into this Code by reference.

## **1.10.0 RULES OF INTERPRETATION**

### **1.10.01 Generally**

In the interpretation and application of this Code all provisions shall be liberally construed in favor of the objectives and purposes of the City of Freeport and deemed neither to limit nor repeal any other powers granted under state statutes.

### **1.10.02 Responsibility for Interpretation**

In the event that any question arises concerning the application of regulations, performance standards, definitions, development criteria, or any other provision of this Code, the Freeport Planning Director shall be responsible for interpretation and shall look to the City of Freeport Comprehensive Plan for guidance. Responsibility for interpretation by the Freeport Planning Director shall be limited to standards, regulations and requirements of this code, but shall not be construed to include interpretation of any technical codes adopted by reference in this Code, nor be construed as overriding the

responsibilities given to any commission, board or official named in other sections or articles of this Code.

#### **1.10.03 Computation of Time**

The time within which an act is to be done shall be computed by excluding the first and including the last day; if the last day is a Saturday, Sunday or legal holiday, that day shall be excluded.

#### **1.10.04 Delegation of Authority**

Whenever a provision appears requiring the head of a department or some other City of Freeport officer or employee to do some act or perform some duty, it is to be construed to authorize delegation to professional-level subordinates to perform the required act or duty unless the terms of the provision or section specify otherwise.

#### **1.10.05 Gender**

Words importing the masculine gender shall be construed to include the feminine and neuter.

#### **1.10.06 Number**

Words in the singular shall include the plural and words in the plural shall include the singular.

#### **1.10.07 Shall, May**

The word “shall” is mandatory, “may” is permissive.

#### **1.10.08 Written or In Writing**

The term “written” or “in writing” shall be construed to include any representation of words, letters or figures, whether by printing or otherwise.

#### **1.10.09 Year**

The word “year” shall mean a calendar year, unless otherwise indicated.

#### **1.10.10 Day**

The word “day” shall mean a working day, unless a calendar day is indicated.

**1.10.11 Relationship of Specific to General Provisions**

More specific provisions of this code shall be followed in lieu of more general provisions that may be more lenient than or in conflict with the more specific provision.

**1.11.0 REPEAL OF PRIOR PROVISIONS**

This Land Development Code repeals the following previously adopted codes:

**1.12.0 ABROGATION**

This Land Development Code is not intended to repeal, abrogate or interfere with any existing easements, covenants, or deed restrictions duly recorded in the public records of the City of Freeport.

**1.13.0 SEVERABILITY**

If any section, subsection, paragraph, sentence, clause, or phrase of this Code is for any reason held by any court of competent jurisdiction to be unconstitutional or otherwise invalid, the validity of the remaining portions of this Code shall continue in full force and effect.

**1.14.0 EFFECTIVE DATE**

These regulations shall be effective as amended below:

**Figure 1.4 List of Land Development Code Amendments.**
