mnCCC
Minnesota Counties Computer Cooperative

# Membership Benefits

Collaboration

MnCCC brings together local government agencies in finding cost-effective, quality software solutions that work for a wide range of agency departments.

Cost Savings

Group contract pricing advantages means the more participation lowers the costs, saving your agency a substantial amount through user group membership.

Software Solutions

User groups take ownership of their software. Some own and manage their software, others use off-the-shelf software that has been customized to fit their needs.

Partnerships

MnCCC forms partnerships with contracted vendors and other organizations that can be a resource for government agencies such as AMC, LMC, NACO, and MACO.

Training

Professional development opportunities are available through MnCCC's training program which includes LinkedIn Learning licenses and a variety of add-on courses!

Contract Negotiation

Eliminate the burden of negotiating contracts on your own! We facilitate the contract process, proposal evaluation, and competitive bidding.

mnccc.gov

MnCCC serves Minnesota counties, cities, state agencies and other joint powers organizations in finding cost-effective, quality software solutions.
