To the left is the summary of the bid tabulations. Each bidder has listed the written bid total as placed in the bid document and the bid sheet tabulation as calculated based on the bidder's unit price and the requested quantity. In instances where an error in the bidder's calculation resulted in a written price that is lower than the per item & quantity price in the bid sheet, the bid sheet tabulation price will control. In instances where the written bid is higher than the bid sheet tabulation price, the written bid price will control. Please note that the Royalton Selectboard reserves the right to reject any and all bids, and is not required to award the bid to the lowest bidder, as per the Town of Royalton's Procurement Policy.
