Application #2: Sandwich Cemetery Association, Dick Devens
spokesperson

The association would like to move 3-4 granite posts and wood railings from a location between Church Street and the rear entrance to the cemetery to a new defining location along Church St. Between Frentress property and Baptist Church. It will more truly delineate the cemetery property at Church St.

Open Discussion: Motion: Diana
Second: Anne

Questions around use of pressure treated railings allowed for the project to proceed using current rails. The HDC board recommends adopting a natural, weather hearty wood such as walnut or cedar in the future. painting the rails will not be required. HDC would like to revisit the subject of the wood railing at a future meeting with the Cemetery Association.
