### The Latest: Keenesburg's Transportation Plan Begins

Keenesburg's first-ever Transportation Plan is starting this Spring! Town staff, in partnership with a transportation planning and engineering consulting firm, will take the first steps to create the Town's first-ever transportation plan, including analyzing data and gathering community input to understand the existing and future conditions of transportation and mobility in Keenesburg. The project team will consider existing land uses and planned developments, traffic operations, safety, access, mobility, and connectivity of all transportation modes such as walking, biking, and driving. The results of this multimodal analysis, in addition to community and stakeholder input, will help to identify the transportation needs of our community and develop near- and long-term actions and recommendations to preserve and improve the Town's transportation system.

### About the Transportation Plan

The Transportation Plan will be a community-driven plan that addresses the near- and long-term multimodal transportation and mobility needs of residents, employees, and visitors. The plan will include:

- ▶ An inventory of existing and planned future conditions
- ▶ An overall vision, goals, objectives, and recommended strategic actions and investments to provide a safe, efficient, connected, and accessible transportation network
- ▶ Identification of key improvement projects for vehicles, bicyclists, and pedestrians
- ▶ Community engagement opportunities at key points

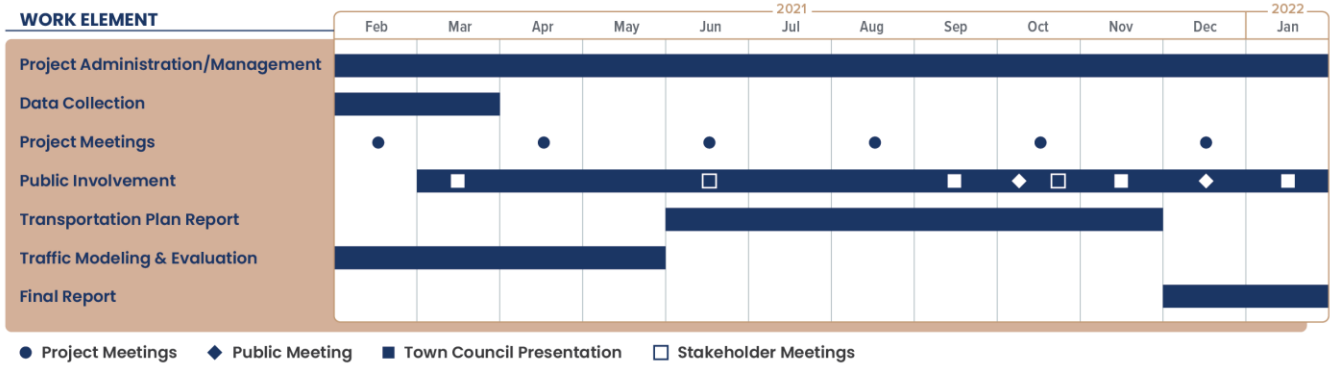

The Transportation Plan is being completed in coordination with other local and regional plans and projects, including the Town's first-ever [Comprehensive Plan](#) [Link, once available].

### Vision and Goals

Existing plans, community input, and staff input, will be used to develop the Transportation Plan's vision and goals. The goals will help guide the development of policies and recommendations, prioritization of projects, and plan implementation strategies. **Have thoughts on the Town's transportation vision and goals? The project team is looking forward to hearing from you! Links to provide input will be posted here soon.**

### Schedule

The Transportation Plan is anticipated to take approximately one year to complete. The major project phases are shown in the schedule below.

### Community Engagement

Community input will be important to ensure the Plan addresses the transportation and mobility needs of the Keenesburg community. As the plan progresses over the next year, please be on the lookout for opportunities to provide your input at upcoming community events and through online engagement. **Links to surveys and online engagement will be posted here.** We look forward to hearing from you!
