

Sign up for Community Broadband Internet today!

A group of community members and the Town have been working together to bring world-class internet service to Washington. We are excited to announce our partnership with Axiom who will be the provider and operate the system on our behalf.

We are now accepting pre-install sign-ups for service
Call Axiom at (207)271-2801 to secure your free installation today!

Why sign up now?

- o A \$60 deposit will reserve you spot for installation during the initial construction period
- o Early subscribers help with the start-up costs of our Town internet initiative and is an investment keeping our community vibrant
- o Early sign ups help the design and planning and keep costs down
- o Show your support for this Town initiative and tell your neighbors to sign up early

-----------------------------------	---

Wireless Router	\$7.50/month
-----------------	--------------

The Axiom Promise:

- GUARENTEED speeds- you pay for what you receive- no “up to” or “best effort”- Axiom will deliver the full bandwidth, Axiom guarantees it.
- Reliability- fiber optics is the most reliable technology on the market while delivering unrivaled speeds and consistent service
- Symmetrical service on all of our plans- same speeds leaving your computer and downloading to your computer- better customer experience
- No monthly contracts
- With Fiber you can “Cut the Cord” and save money!

How will service come to my home?

From the nearest utility pole-The fiber will be hung throughout the town on existing utility poles. For installation to your home, we will follow the existing aerial telephone service lines that come from the road to your house, where a small box will be installed on the side of the home to provide fiber connectivity.

Underground installation – Underground fiber service is an option is available IF there is an existing, usable conduit, that does not contain electrical service. If a conduit must be installed, that will be at the expense of the homeowner. With some limitations, Axiom will run fiber through a properly installed conduit that is installed by the homeowner. Axiom recommends working with a local contractor to install and prepare the conduit to accept service and will provide specifications to the homeowner for this type of installation upon request.

Axiom will work with individual homeowners to address reasonable concerns about cable routing and other issues while running the fiber, however, additional costs may be incurred if the homeowner’s request is determined to require significant additional staff time for installation. Axiom will not be responsible for landscape restoration, replanting, repairing turf damage, or other remediation required as a result of any additional work completed at the homeowner’s request.

Additional Dwellings/Family compounds – Two options are available:

- No-cost installations to as many buildings as are desired may be ordered as described above by paying a \$60 deposit, or
- You may share a connection between buildings on your property (garage, guest house, etc., provided they are all on the same tax map lot) but wiring connections between the buildings will be your sole responsibility.

Sharing service between multiple properties (different tax map lots) is not permitted. Should you so desire, Axiom is available, at our customary rates, to consult on and construct customized solutions to integrate additional buildings on your property into a wired or wireless network, connecting back to your fiber connection.

Washington
MAINE
OUR COMMITMENT TO YOU

Axiom
every connection counts

When will the service be available?

We are expecting service hookups to begin in early 2024. However, several factors could affect when service will begin. We will keep you apprised of our progress.

What if I don't sign up during the free install period?

Once construction is completed, the free installation period will end and installing service will become the responsibility of the homeowner. Fees for installation will be determined on a case-by-case basis, but you can expect several hundred dollars or more for installs requested after the free install period closes. Take advantage of this great deal now and avoid future high-cost installation!
